

What can a new K-12 virtual school journey look like?

Deeper Exploration & Inquiry • Project Based Learning • Global Competency • Creativity

emotional
well-being

interactive student
engagement

relationships

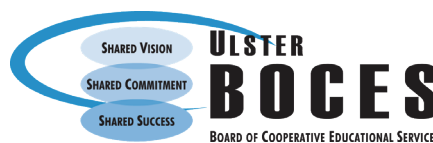

River to River K-12 Virtual Academies is a K-12 on-line school that is inclusive, flexible, and accessible—without compromising academics and achievement, powerful learning experiences, and the development of the whole student. We will support and nurture healthy interactions where students collaborate with teachers, parents, and other partners in order to advance their learning, build their capacity, and find joy in each day.

With flexibility, low student/teacher ratio, and our supportive approach, students can excel in a virtual environment through powerful learning experiences and project-based learning.
